HSTS016I

Hall split core current sensor

Open loop split core type,hanging installation,cable output.Detect DC,AC and pulse current, High insulation between primary side and the vice side circuit.

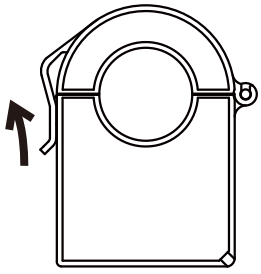
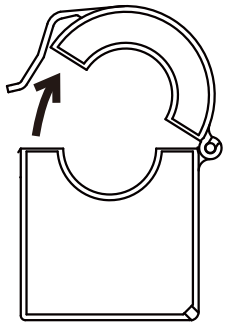
Product features

- Light weight
- Low power consumption
- Good linearity
- No insertion loss
- Fast response time
- Good anti-interference ability
- Protection grade:IP63

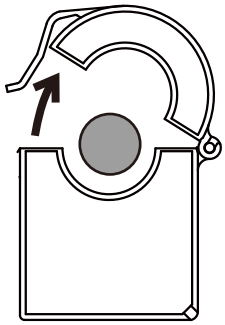
Installation diagram



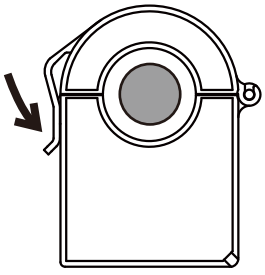
1.Loosen the card buckle



2.Open up



3.In the lead



4.Fasten card buckle

Product application

- Railway
- Metallurgical
- Welding machine
- Robot
- Motor
- Inverter power supply
- Variable frequency governor
- Uninterrupted power supply and communication power supply

Electrical parameters: (The following parameters are typical values and actual values will be subject to product testing)

I_{PN}	Rated input	±50A	±100A	±200A	±300A	±400A	±500A	Standard input
Ipm	Input measurement range	±75A	±150A	±300A	±450A	±500A	±500A	Default is 1.5 times of rated input, and maximum ≤500A (saturation)
Vout	Rated output	2.5V±0.625V						
X	Accuracy	1%						$I=I_{PN}$
εL	Linearity	1%						$I=0\sim\pm I_{PN}$
Vc	Supply voltage	+5V						Supply voltage range±5%
Ic	Current consumption	≤16mA						Reference will be subject to the measured
Rl	Load impedance	≥10KΩ						Collection port impedance while lower voltage affect accuracy
Voe	Zero offset voltage	≤±15mV						TA=25℃
Tr	Response time	≤5μs						Reference will be subject to the measured
N.w	Weight	60g						Reference will be subject to the measured
Ta	Operation temperature	-10～+70℃						
Ts	Storage temperature	-25～+70℃						
Bw	Band width	DC~25KHz						Factory test according to DC
Vd	Delectric strength	2.5KV 50Hz 1min						

Remarks:

Factory commissioning :

1. Debugging with 0V as the reference point(acquiescence)
2. Debug with Vref as the reference point(optional)

Calculation formula：2.5V±0.625V 0V datum

Forward direction：$2.5+(I/I_{PN})*0.625$

Reverse direction：$2.5-(I/I_{PN})*0.625$

Instructions for use:

1. According to the connection mode of correct connection
2. The direction shown by the arrow is positive
3. With hole measurement, response time and following the speed for the best
4. Faulty wiring can lead to product damage and output uncertainty

Safe operation:

*Please read this specification carefully before use.

*When you need to move the product, please be sure to disconnect the power and all the connected cables.

*If found shell, devices attached to the fixed parts, wire, or have any damaged, please immediately deal with hidden dangers.

*If there is any doubt about the safe operation of the equipment, the equipment and the corresponding accessories should be closed immediately, and the fastest time for troubleshooting.

Proclamations:

As our products are constantly being improved and updated, we reserve the right to modify the content of this specification at any time without prior notice.

Dimensions(in mm±0.5）：

Side view

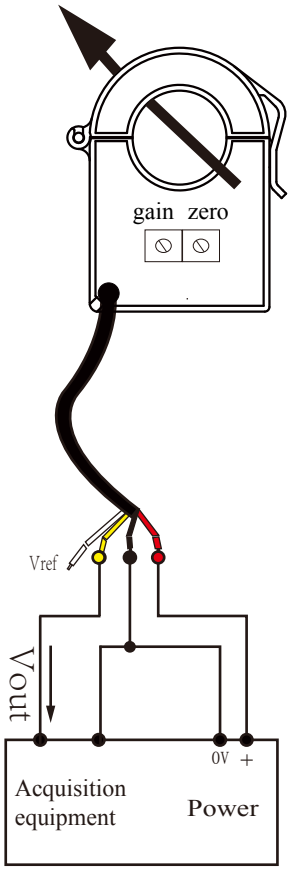
Cable：

Cable specification：
0.2mm^2 four-core shielding wire

Four core colors:
red, black, yellow and white

Cable length: 50cm

Wiring diagram (based on 0 V)



Cable definition：

red： +V
black： 0V
yellow： Vout
white： Vref（Hoverability）

Potentiometer definition：

Left： gain
right： zero

※Detection：

①Choose the auxiliary power supply with small ripple (≤10mV)
②Switch on auxiliary power
③The auxiliary power is connected to the sensor
④The sensor detects the primary current
